DATE:– 03/06/2025

## Introduction:

This HTML code represents a basic webpage for "**MedCare – Online Medical Shop**", designed using HTML. The layout consists of a **header** with the site's name and tagline, a **main content area** displaying a list of medicines in a styled table, and a **footer** with contact information. The table outlines the **medicine name**, its **use**, and **price**, making it easy for users to browse and understand available options.

## Tools Used:

```

Ln 9, Col 39 Spaces: 4 UTF-8 CRLF () HTML Port: 5500

## Conclusion:

Overall, this code effectively showcases a functional and user-friendly interface for a small-scale online medical shop. The structure is clean and informative, suitable for a basic product listing page. For future improvements, interactivity (like search, filter, or cart features), responsive design, and backend integration could be added to enhance user experience and functionality.
